

## Making the case

Our litigation support team provides attorneys and business owners with real transaction experience and a thorough understanding of the science of business valuation. Our seasoned professionals possess extensive experience both in the board room and the courtroom.

Our clients in the legal profession trust our judgement and frequently call upon our professionals to present evidence and testimony before judges and juries throughout the region.

The trust attorneys place in us is based on three decades of dealing with complex financial issues and transactions. One of the most notable assignments was representing the Coca-Cola® company in the landmark Diet Coke® lawsuit. That case involved the valuations of over more than 30 independent bottlers, each valued at three points in time.

### **Business Valuation**

Decosimo's litigation support team includes six professionals with the ABV designation (Accredited in Business Valuation) of the AICPA, as well as professionals who hold the ASA, CBA and Bval designations. These credentials are evidence of our thorough understanding of the financial and operational aspects of a business. And they are the marks of experienced and seasoned experts who provide clear, compelling and credible testimony to a judge or jury.

### **Data Analysis and Compilation**

We help develop and present objective evidence that clearly shows the merits of a legal position. We turn a seemingly overwhelming amount of data into evidence that is used to make the case.

### **Evidence Assistance**

Sometimes the answers are discovered by asking the right questions. By formulating the appropriate queries, we are able to establish precise and credible evidence.

### **Deposition Assistance**

Working with attorneys, we help develop the questions that uncover the most pertinent financial information during a deposition or cross examination.

### **Expert Testimony**

Nearly three decades of courtroom experience as expert witnesses makes us a regional leader in litigation support. Our testimony experience includes economic damages in commercial litigation, valuation of intellectual property, and other complex accounting and financial issues.
